

K-Love Radio station provides good, moral, positive, and encouraging broadcasts throughout many communities. In doing so, K-Love is on the air without the aid of commercials. They are supported by listeners all over the country. K-Love deserves the ability to not have to compete over transmission because of Low Power FM (LPFM). My question would be "What is the point of moving to LPFM?" There is much value in having your children choose to listen to a station with values and no foul jokes and language. Without being discriminatory, people deserve a choice. It gives people positive listening options, not to mention the fact that K-Love has prayed with, encouraged, and help people in communities that otherwise would have been doomed. Anytime you can support clean and positive airwaves, it is in the best interest of every community to do so. There is enough violence, drugs, and music that references such things. Please consider letting us keep our K-Love's ability to stay on the air and make positive contributions to our community.
